## COMPANY OVERVIEW

Snowbird Technologies is an established and trusted original equipment manufacturer for commercial and government markets. As a small business, our team is dedicated to producing quality, reliable products that support the goals of each mission. We are uniquely qualified to design and manufacture specialized solutions for climate control, water production, and additive manufacturing for use in austere and industrial settings.

## BRANDS

- Snowbird Technologies
- Snowbird Water Technologies
- Snowbird Additive Mobile Manufacturing Technologies

## DIFFERENTIATORS

- Custom-built and turnkey equipment options
- In-house engineering expertise for all product lines
- Patent-protected technology

## CURRENT CONTRACTS

- N6833518D0017-N6833523F0055 NAWC Aircraft Division
- NSN 4120-01-512-2399 NAVAIR
- NSN 4120-01-550-2063 Defense Logistics Agency

## CORE CAPABILITIES

- Design, engineer, and manufacture custom environmental control units (ECUs), air-to-water generators (AWGs), and additive manufacturing system platforms (SAMM Tech) to meet specific user requirements and applications.
  - ECUs rated to operate in conditions ranging from -50°F to 125°F
  - AWGs rated to produce water amounts ranging from 14-gallons to 28-gallons per 24 hours
  - SAMM Tech units designed for mobility and hybrid metal, plastic and composite manufacturing (additive and subtractive capabilities)
- Turn-key product offerings based on industrial and Department of Defense specifications
  - 6+ ECU models
  - 2 AWG models
  - 2 SAMM Tech models
- Onsite stocked warehouse for replacement and repair parts needs

## FACILITY & LOCATION

- 7749 Bayberry Rd., Jacksonville, FL 32256
- 40,000 sq ft of office, warehouse, and production space
- Strategic location near main thoroughfares of I-95 and Jacksonville Port Authority (JAXPORT)
- Loading dock to accommodate 53-ft. trailer
- Advanced testing facilities onsite
- Cutting-edge paint booth and accommodations
- Machine shop and fabrication
