## COMPANY OVERVIEW

Snowbird Technologies is an established and trusted original equipment manufacturer for commercial and government markets. As a small business, our team is dedicated to producing quality, reliable products that support the goals of each mission. We are uniquely qualified to design and manufacture specialized solutions for atmospheric water generation, providing life-supporting water when traditional means are not available.

## BRANDS

- Snowbird Water Technologies

## DIFFERENTIATORS

- Custom-built and turnkey equipment options
- In-house engineering expertise for all product lines
- Portable and trailer-mounted atmospheric water generators
- Water cleaned to exceed US residential water standards

## CORE CAPABILITIES

- Design, engineer, and manufacture custom atmospheric water generators (AWGs) to meet specific user requirements and applications
  - AWGs rated to operate in conditions ranging from 45°F to 125°F and 30% to 99% humidity
- Turn-key product offerings based on industrial and Department of Defense specifications
  - 3 AWG standard models
  - Based on model, produce up to 150-gallons/24 hrs
  - Custom larger offerings available
- Tested and verified product offering
  - MIL-STD-810
  - IAW TB MED 577 short-term potability standards
  - Passed 3rd party potable water tests by AECOS, Inc.
- Onsite stocked warehouse for replacement and repair parts needs

## FACILITY & LOCATION

- 7749 Bayberry Rd., Jacksonville, FL 32256
- 40,000 sq ft of office, warehouse, and production space
- Strategic location near main thoroughfares of I-95 and Jacksonville Port Authority (JAXPORT)
- Loading dock to accommodate 53-ft. trailer
- Advanced testing facilities onsite
- Cutting-edge paint booth and accommodations
- Machine shop and fabrication
